Use a cable tie and tag the transponder on the right part of your wheel fork as low as possible.

Please follow correctly the directions above to avoid the contingent loss of transponder and to optimise transponder position. Just this way placed transponder can warrant error free reading in read-zone. Beware of having the transponder in a pocket, free in your sock, tagging by a shoe-lace or fastening on your arm.

The transponder stays in property of SportSoft company and is by organizer borrowed to you only for the time of competition. Please return the transponder after finishing the competition, as well as you didn’t finish it.

In case of no starting or no finishing the competition, please return always the transponder to the hands of organizer. In the event of transponder loss inform the organizer about it. You’ll make it easier to both sides – to you and to the organizer. Thanks.
